Letters to: WaterLIFE@comcast.net

Michael -
I'm sending you a few cartoons, use none or all.
I hope that someone from Charlotte County is taking notes on how BP is trying NOT to pay for the devastation in the Gulf. This will be the model that Mosaic will use when one of their dykes fail and it kills the Harbor.
Someone has to have the stones to be able to step on the county commissioners. They are out of control.
I don't mean to put you on the spot. I know Water LIFE is a business and I will understand if you remain silent.
Best Regards,
Harry Thomas

*Editor notes**
Thanks Harry
Here is the first one. (we colorized it so it will stand out better!) I'd like to think we have the 'stones'... granite stones not limestone!
It should get really interesting soon, with two new commissioners coming in. - MH

Another highly productive meeting of the Charlotte County Commissioners
